

Key Iraq Events - Gas

Khor Mor Gas Field Expansion Suspended

Following three rocket and mortar attacks in four days, the Pearl Consortium developing the Khor Mor gas field, has suspended expansion work as contractors began evacuating the site. Production has not been affected at the field which sends around 440 Mcf/d of gas feedstock to power plants, generating the vast majority of Kurdistan's electricity and parts of Federal Iraq. Another rocket attack targeted the Khor Mor field on July 25 two days after PM Barzani's visit to discuss oil and gas disputes with Baghdad.
